## OFFICE LED PANEL

MODEL No: 03017

Office lighting is essential for the productivity and safety of your employees.

Whether you are creating a new office space or want to upgrade their office lighting of your existing office, you cannot overlook the importance of good lighting.

LED lights are energy efficient. It is because LED lights have bright chips and less energy is required for illuminating the room. So, LED lights will help save 50% on energy costs.

LED lights are capable of preventing glare thanks to its advanced and innovative system. Glare can cause irritation and discomfort for the employees. It will also restrict their productivity as they will not be able to focus on their work. LED lights have an anti-glare design.
